Table of Contents

2000 Annual Report

i. Introduction

I. Tennessee Student Data

A. Tennessee Student Demographics

- 3** Number of Students in Public School Systems
- 7** Ethnic Composition of Tennessee Public School Systems
- 11** Title I Compensatory Education Program
- 17** Free and Reduced-Price Meal Programs
- 21** Special Education Programs
- 25** English Language Learner Programs

B. Tennessee Student Performance

- 31** Attendance Rates for Students in Public Schools
- 35** Promotion Rates for Kindergarten through Eighth Grade
- 39** Dropout Rates Grades Nine through Twelve
- 49** Students Expelled or Suspended
- 59** Tennessee Comprehensive Assessment Program Grades Three through Eight
- 71** Tennessee Comprehensive Assessment Program (TCAP) Writing Assessment
- 75** Tennessee Value-Added Assessment System
- 81** Tennessee Comprehensive Assessment Program (TCAP) Competency Test
- 85** High School Subject Matter Tests—Math
- 89** Scholastic Aptitude Test -SAT I
- 93** American College Test—ACT
- 99** American College Test (ACT)—Work Keys

II. Tennessee School Systems Data

A. Tennessee School System Demographics

- 105** Total Schools and Grades Served
- 109** Personnel by Category
- 115** Employment Standards Waivers and Permits

B. Finance

- 121** Expenditures by Public School Systems
- 135** Expenditures by Function
- 155** Expenditures per Student
- 159** Expenditures for Principal and Interest on Bonded Debt Paid by Other Agencies
- 163** Average Salaries for Teachers
- 167** Public School Funding by Source
- 175** Incentive Awards Program
- 179** Basic Education Program (BEP) Formula
- 193** County-Area Education Fiscal Capacity

Class System*

2000 Annual Report

Annual Report Provides Detailed Snapshot of Tennessee Public Schools, Highlights Challenges

How much are the students in Tennessee schools learning? Will they be able to compete with their counterparts from other states? Will they be able to get and keep good jobs in an international economy? What are we doing to help our schools improve? Are our schools safe for our children? These are the questions' parents, businessmen, and educators across the state are asking. These are some of the questions the Annual Report for Tennessee is designed, at least in part, to help answer.

During his two terms as governor, Don Sundquist has placed a high priority on education. The governor pushed for and won legislative approval for the full funding of the Basic Education Program (BEP) that provides equitable distribution of money for the state's school systems. Governor Sundquist also addressed the "Digital Divide" with his initiative called "ConnecTen," a computer project that connects every school in Tennessee to the Internet. This program has resulted in Tennessee receiving a number one ranking in the nation by the National Education Goals Panel for its achievements in meeting goals for mathematics and science.

These accomplishments, along with the requirements established in the Education Improvement Act of 1992, have moved Tennessee toward education excellence. The state has set stricter standards for students to prepare them for higher education and the workforce and has made educators more accountable. Education is no longer business as usual. Tougher academic performance standards with testing at multiple grade levels measure students' attainment levels as well as their annual progress. This annual progress is called value-added, a system of utilizing data to improve student progress and education programs. The value-added system sets Tennessee apart from other states' testing programs by demanding more specific data and therefore, greater

accountability. The act has established other requirements resulting in a reduction in the state dropout rate, equitable funding for the state's 138 school systems, and requiring annual report cards for the public.

Tennessee's Annual Report and Report Cards, detail snapshots of Tennessee's public school systems, inform the public about the progress made in all these areas plus other topics such as attendance rates, promotion rates, expulsion rates, per pupil expenditures and other demographic information. For the 1999-2000 school year, the Department of Education went one step further with accountability by issuing Report Cards for all the 1600 public schools in the state. For the first time, information is now available for parents and educators to see strengths and needs of an individual school. Providing the school level report cards helps both the department and school systems plan toward accomplishment of the required academic performance standards set by the State Board of Education.

Tennessee's Testing System

The Annual Report and Report Cards give results of Tennessee's testing system, Tennessee Comprehensive Assessment Program (TCAP), which measures both attainment levels as well as the annual progress of students. Students are tested in grades three through eight in five subject areas: math, reading, language arts, science and social studies. A writing test is required for elementary, middle, and high school to assess the written communication skills of students necessary in today's workforce. Since the 1994-95 school year, students have been required to pass a TCAP Competency Test as a graduation requirement. The test is first administered in the ninth grade. In 1998, the State Board of Education specified the end-of-course tests that high school students are required to take in 10 subjects. These tests broaden the expectations for students and link the curriculum with state-mandated assessments. The 10 subjects are: Math Foundations II, Algebra I, Geometry, Algebra II, Physical Science, Biology, Chemistry, English I, English II and U.S. History. Starting with entering freshmen in 2001-2002, students must pass three of the tests to receive a regular high school diploma in Tennessee. These assessments have been designated as the Gateway Tests and are in the areas of Algebra I, Biology, and English II.

Students must also take an exit exam, which assesses their readiness for the workplace or higher education, to receive a high school diploma.

Setting High Standards for Quality Education

The state's assessment program, along with high standards and goals, have been implemented to improve student performance and to make Tennessee a leader in education. This Annual Report, along with the Report Cards, provides a portrait of the state's educational system, giving Tennessee citizens an accurate, thorough, and accountable overview of every school system. The report allows all Tennesseans to see the status of their school systems, what they have accomplished, and where they need to improve.

2000 Annual Report Overview

The Annual Report is an extension of the school Report Cards that provide parents, educators, local officials, business and industry leaders and community members with an inside look at how their schools are performing and how state education funds are being spent.

The 2000 Annual Report is a component of the ninth set of annual accountability reports the Tennessee Department of Education has published since the Education Improvement Act (EIA) took effect in July 1992. Through its reform efforts and initiatives, Tennessee has rekindled the spirit of the community school and is getting parents and community leaders informed and involved in public education.

What's in the Annual Report?

The Annual Report portrays the condition of education in Tennessee's 138 local school systems. The report explains to parents and taxpayers the gains students are making on standardized achievement tests, improvements in attendance, promotion and dropout rates, as well as reductions in the number of suspensions and expulsions. Also, the report reflects the amount of funding each school system receives from state, local and federal governments and how these funds are expended to improve education in our Tennessee schools.

The data tables used in the Annual Report will be made available on the department's web site at <http://www.state.tn.us/education>. (Go to Stats and Reports, then to Report Card 2000.) There is a brief narrative before each set of statistical tables to introduce the information presented in that section. Each item illustrates a portion of the education snapshot.

What's new in the Annual Report?

The 2000 Annual Report includes information on incentive awards to local schools for superior performance on specified measures of accountability. The amount of incentive money received in each system is reported.

How is the Annual Report used?

The numbers, tables and spreadsheets in the Annual Report do not tell the entire story of the progress, accomplishments and achievements made or of the areas of concern. The system reports provide an opportunity for the public to initiate conversations with local school officials and to learn more about the quality of education taking place in their schools.

At the heart of the data reporting process is an emphasis on school improvement. The information in these reports can be used to evaluate how well school system goals are being met, how much students are learning and how efficiently school districts are being run. These reports enable all Tennesseans to know what their education tax dollars have achieved and will encourage community members to hold their schools accountable for results.

Tennessee Public School Systems
Number of Students

The number of students in public schools in Tennessee has increased annually since 1991-92. The total increase between 1991-92 and 1999-00 was 8.08%. Student counts in 20 systems have increased at more than twice the statewide rate of 8.08%; counts in fourteen of those systems have increased by more than 20%. At the same time, 39 systems have had increases of less than 5%.

The information in the following table is based on the average of daily counts of students enrolled in each school system. These counts are often referred to as average daily membership or ADM. They are a major factor in determining the amount of state funding each school system receives.

Tennessee Public School Systems
Ethnic Composition

The ethnic composition of the population of students in Tennessee public schools is fairly stable from year to year statewide. Counts of students by ethnic group show that Tennessee's statewide public school population during the 1999-2000 school year in kindergarten through twelfth grade was approximately 73% White, 25% Black and 2% other minorities. The ethnic composition of some systems did change significantly.

Student demographic data, such as ethnic composition, is based on an annual count of fall student membership. Membership is a count of students actually enrolled. Data on ethnic composition is included in this report to describe one aspect of Tennessee's public school student population.

Tennessee Public School Systems
Title I Compensatory Education Programs

The federal Title I program provides funds to school systems to help students who are failing or are at risk of failing to meet state standards. These funds may be used to help individual students or, in high poverty areas, all students within an eligible school. Title I programs establish certain expectations for academic success, and schools that do not meet expectations must amend school improvement plans to implement changes likely to improve student achievement. Schools that do not improve are subject to a variety of sanctions that may be imposed by the school system.

Almost two-thirds of the school systems (81 of 137) that have Title I programs have been successful in meeting the program's academic expectations. As shown in the chart below, the percent of students participating in Title I programs has increased somewhat, as well as the number of schools participating. However, the percent of schools meeting Title I expectations has declined. The reason for this decline could be the result of the change in assessment instruments.

	1996-97	1998-99*
Students Participating	22.3%	28.2%
Schools Participating	726	769
Schools Meeting Academic Expectations	85.4%	78.1%

The information in the table on the following pages shows for each school system the number and percent of students served by a Title I program. The table also shows for each system the number of schools with Title I programs and the percent of schools that met Title I expectations for academic success.

* Data for 1999-2000 was unavailable at the time of publication.

Tennessee Public School Systems
Free and Reduced-Price Meal Programs

The percentage of students eligible for free or reduced-price meals has remained relatively stable both at the system level and statewide. Approximately 42% of all students in Tennessee public schools are eligible for free or reduced-price meals. This figure is up just slightly over last year. Compared to previous years, figures for school systems have remained fairly stable, with around 35 of the 138 school systems having 50% or more of their students eligible for free or reduced-price meals. In most systems, 30% to 50% of the students are eligible for free or reduced-price meals.

Because of the link between poverty and poor performance in school, the state provides additional funding through the Basic Education Program (BEP) formula to lower class sizes in schools with higher percentages of students eligible for free or reduced-price meals. Funding is generated by the formula to reduce class sizes in kindergarten through third grade from the Education Improvement Act (EIA) standard of 20 students for one teacher to a standard of 15 students for one teacher. The federal Title I Compensatory Education Program also uses data on eligibility for free and reduced-price meals to allocate funds.

Tennessee Public School Systems
Special Education Programs

In school year 1999-00, 16% of all public school students in Tennessee received special education services. The percentage of students receiving services in each school system ranged from a low of 8.7% to a high of 25.6% in 1999-00. Twenty-five school systems had 20% or more of their students in special education programs, while fifty systems had 15% or fewer of their students in special education programs.

Prior to the 1995-96 school year, the number of special education students reported was based on a one-day head count. Since 1995-96, special education student counts are based on an average count for the entire year (Special Education Services Average Daily Membership for Primary Options). These figures are a major factor in determining the amount of state funding each school system receives.

Because special education services cost more than regular instruction programs, both the state and the federal government provide additional funding for those services. State funds are provided as part of the overall funding included in the Basic Education Program (BEP) formula for classroom expenses. This formula includes caseload funding ratios for teachers; additional personnel for assessment and teacher assistants; and materials, supplies, instructional equipment and classroom-related travel.

Tennessee Public School Systems
English Language Learner (ELL) Programs

Students whose “Primary Home Language is Other Than English” (PHLOTE)

An English Language Learner (ELL) is one whose native language is not English and whose difficulty in listening, speaking, reading or writing English is an obstacle to successful learning in a classroom where English is the language of instruction. The ELL student must be provided the services of a certificated English as a Second Language (ESL) teacher.

For school year 1999-2000, 99 of the 138 school systems (72%) in Tennessee reported 10,616 ELL students, which is 125% greater than the 8,496 students reported during the 1997-1998 school year. However, both the number of school systems and the number of students reported each year have increased substantially since the 1993-94 school year when 47% of the school systems reported 3,430 ELL students. Increases were reported both in large urban systems and in rural counties.

Tennessee Public School Systems
Attendance Rates

The attendance rate is the average number of days students attend school compared to the average number of days the students are enrolled. The tables on the following pages include separate attendance rates for Tennessee public school students in kindergarten through sixth grade and for students in grades seven through twelve. Attendance rates are important because they may affect students' achievement.

Attendance rates for Tennessee's public school students tend to be stable from year to year with an overall 95% attendance rate for students in kindergarten through sixth grade and 93% for students in grades seven through twelve as reported in 1999-00. During the 1999-00 school year, 87% of Tennessee's public school systems with students in kindergarten through sixth grade achieved an attendance rate of 95% or higher. For those Tennessee public school systems with students in grades seven through twelve, 87% achieved an attendance rate of 93% or higher during the 1999-00 school year.

Tennessee Public School Systems
Promotion Rates for Kindergarten through Eighth Grade

The overall promotion rate for all Tennessee public school students in kindergarten through the eighth grade in 1999-2000 was 96.8%. The statewide figure has increased slightly since 1997-98 when it was 96.6%. Promotion rates by school system for the 1999-2000 school year ranged from 90.9% to 99.7%. One hundred-one of Tennessee public school systems achieved a promotion rate of 97% or greater.

The Tennessee promotion rate is the total number of Tennessee students promoted to the next grade at the conclusion of the school year divided by the number of students promoted plus the number of students retained. A promotion rate for each Tennessee school system is reported in the following table for kindergarten through the eighth grade. This rate is an indicator of student academic progress. A low promotion rate often correlates to a potential student dropout problem.

In past years, promotion rates were reported as of June 30th. For 1999-2000, that date was extended to August 15th, so those students promoted after completing summer school could be included.

Tennessee Public School Systems
Dropout Rates
Grades Nine through Twelve

The Tennessee statewide dropout *event rate* has varied only slightly over the years, but varies considerably among systems for 1999-2000, from a high of 10.3% to less than 1%. In 1999-2000, the statewide dropout event rate was 3.9% down from 4.2% in 1998-99. Event rates are important because they reveal the proportion of students who leave high school each year without completing a high school program. Tennessee defines the event rate as the number of students in grades nine through twelve who drop out of school during a given year divided by the net enrollment in grades nine through twelve for the same year.

The statewide dropout *cohort rate* for 1999-2000 was 14.4%, down slightly from 1998-99, when it was 14.8%. The 1999-2000 cohort rate varies considerably among school systems, from a high of 48.2% to a low of 0.0%. During the 1999-2000 school year, 43% of all Tennessee public school systems had a cohort dropout rate of 10% or less. The cohort rate is the percentage of an entering ninth grade class that has dropped out by the end of twelfth grade. It is calculated by dividing the number of students in a graduating class, who dropped out over the four years they were in high school, by the class's ninth grade net enrollment.

Tennessee defines a dropout as an individual who (1) was enrolled in school at some time during the previous school year; (2) was not enrolled at the beginning of the current school year; (3) has not graduated from high school or completed a state- or system-approved education program and; (4) does not meet any of the following exclusionary conditions: (i) transfer to another public school, school system, private school, or state- or system-approved education program; (ii) temporary absence due to suspension or illness; or (iii) death. [Definition adopted from the National Center for Education Statistics (NCES).]

This year, the Tennessee Department of Education is publishing dropout data by race and sex. Rates are not considered statistically significant if the number of students in net enrollment is 100 or less. These categories are marked "ns".

Tennessee Public School Systems
Students Expelled or Suspended

The total number of students expelled and suspended from Tennessee public schools during the 1999-2000 school year decreased compared with 1998-99 figures.

The data reported in the following table includes the total number of students in Tennessee public schools, kindergarten through twelfth grade, who were expelled or suspended from school. Suspensions and expulsions are included in this report as indicators of student conduct and disciplinary problems in schools. These numbers do not include students who were expelled or suspended from Tennessee public schools and placed in alternative school programs.

A Tennessee student who is expelled from school is forbidden to attend and is considered inactive on school rolls during the period of expulsion. Expulsions are usually long term; for a semester or an entire school year. A student who is suspended from school is forbidden to attend during the period of suspension. During the suspension period, which is usually short term, the student remains on the school rolls.

This year, Tennessee is calculating expulsion and suspension rates by race and sex. Rates are not considered statistically significant if the number of students in net enrollment is 100 or less. These categories are marked “ns”.

Tennessee Public School Systems
Tennessee Comprehensive Assessment Program
Grades Three through Eight

A comprehensive set of nationally normed achievement tests is administered annually to Tennessee students in grades three through eight. These tests provide norm-referenced data for national comparisons as well as criterion-referenced information for use in determining whether students have mastered specific instructional objectives. These tests also provide the data necessary for the Tennessee Value-Added Assessment System. [For more information on that topic, please see the section with that title.] Student performance as shown in these tables and in the chart below is expressed in terms of national percentiles. The 2000 national percentiles are based upon comparisons to the latest national performance obtainable.

2000 National Percentiles

Grade	3	4	5	6	7	8
Reading	56	55	56	51	46	54
Language	59	60	53	56	56	58
Math	62	58	53	53	53	58
Science	55	54	54	56	51	53
Social Studies	55	55	55	55	52	56

Five achievement levels have been established based on what students should know and be able to do as they progress through each grade. The levels are: *Step 1, Progressing, Nearing Proficiency, Proficient, and Advanced*. The two benchmark grades for attaining *Proficient* or *Advanced* are grades five and eight. The standards for attaining these levels are very high. As shown in the following table, Tennessee students exceeded the national percentage of students attaining *Proficient* or *Advanced* levels of performance in all of the subject areas tested in grades five and eight.

Percentage of Students Attaining *Proficient* or *Advanced*

Subtest	Grade 5		Grade 8	
	State	Nation	State	Nation

Tennessee Public School Systems
Tennessee Comprehensive Assessment Program (TCAP) Writing Assessment

All Tennessee fourth, seventh and eleventh grade students are required to take a writing assessment. This requirement began with the 1994-95 school year and is based on a State Board of Education regulation designed to ensure that all Tennessee students could communicate well in writing. The percentage of students performing at the competent level or better has increased steadily statewide and for most school systems.

The TCAP Writing Assessment is a performance-based test in which students are required to write an essay on a specified topic within a certain amount of time. Fourth graders are asked to write a narrative essay; seventh graders are asked to write an expository essay and eleventh graders are asked to write a persuasive essay. The following chart shows the six-point scale on which scores are based:

Score	Performance	Score	Performance
6	Outstanding	3	Limited
5	Strong	2	Flawed
4	Competent	1	Deficient

In February 2000, the sixth annual TCAP Writing Assessment was administered to 69,708 fourth grade students, 63,372 seventh grade students, and 47,007 eleventh grade students in Tennessee public schools. The scores were improved in all grades. This was the third year for administration to seventh grade students. Between 1995 and 2000, the percentage of students who scored in the “competent” to “outstanding” range increased from 16.3% to 64.3% in grade four and from 30.3% to 62.1% in grade eleven. The seventh grade percentage for this third year increased from 52.0% in 1998 to 61.8% in 2000. The following chart compares student performance for each year of test administration:

**Comparison of 1995 - 2000 Percent of Students
Scoring Competent or Better**

The table presented on the following pages shows the percent of students performing at or above the competent level in each grade level tested.

Tennessee Public School Systems
Tennessee Value-Added Assessment System

The Tennessee Value-Added Assessment System (TVAAS) is designed to measure students' academic gain over time by comparing each individual student's past performance on tests from the Tennessee Comprehensive Assessment Program (TCAP) to their performance in a given year. The value-added system uses test results from the assessments taken by Tennessee students each spring in grades three through eight. The scale for each test in the TCAP set of tests increases with each grade level so that a difference can be calculated to show how much a student learns each year. For example, the difference between a student's score on the third-grade math test and his or her score on the fourth-grade math test indicates how much the student learned in the fourth grade. The value-added reports complement the TCAP reports and provide additional information on students' academic success.

This system assumes that all students can improve academically each year at the same rate as all other students. Imagine a child climbing a ladder. Each successive rung represents higher academic achievement. Regardless of which rung the student stands on at the end of one year, his or her goal should be to climb at least as many rungs the next year as the average student climbs. The number of rungs the average student will climb is based on a national sample of students that was carefully selected to represent all students. The actual performance of the national sample of students is called the national norm; the difference in scores between students in different grade levels is called the national norm gain. Tennessee students' actual performance is compared to that standard.

**Change in the Percent of Three-Year Average Academic
Cumulative Gain for 1993 through 2000**

Three-year average gains are used to determine whether systems are meeting the requirement of making 100% of the national norm groups' gains in the academic areas. The performance of Tennessee students has improved since 1993, the first year for which three-year average cumulative gains were provided. The results for students in each Tennessee school system are presented in the table on the following pages.

Tennessee Public School Systems
Tennessee Comprehensive Assessment Program (TCAP) Competency Test

Since 1982, Tennessee has administered a “high stakes” graduation test in math and language arts as part of the graduation requirement. To receive a regular high school diploma, students must take and pass both parts of the TCAP Competency Test. The standards were raised in 1995, and the name of the test changed from Tennessee Proficiency Test to TCAP Competency Test. Students are first offered the opportunity to pass the test in the ninth grade and may retake the test each year until they graduate. The tables on the following pages show the percent of all ninth grade students who passed one or both parts of the test during their ninth grade year.

For 1999-2000, 64% of those taking the test for the first time passed both parts, 76% passed the language arts subtest and 70% passed the mathematics subtest. The performance of Tennessee students has improved since 1995 when comparable figures were 61% for both parts, 78% for language and 66% for mathematics. The information presented by system in the tables on the following pages does not include students who receive more than four hours of special education services per week. When special education students are included in the data, the pass rates for 1999-2000 become 60% for both parts of the test, 65% for mathematics and 71% for language arts. As the chart below illustrates, both groups of students performed similarly on the test in 1999-00 as in 1998-99.

**TCAP Competency Test Statewide Results
1995-2000**

Percentage of
Students Meeting
the Requirement

Tennessee School Systems
High School Subject Matter Tests—Math

The 1999-2000 fall and spring assessments of high school mathematics revealed an overall upward trend in student performance in Unified Geometry and Algebra II over the four-year period from 1996-97 through 1999-00. Scores for Algebra I and Mathematics for Tech I remained at 62% and 66% respectively.

Average Percent Correct

Subject	1995-96	1996-97	1997-98	1998-99	1999-00
Pre-Algebra	49%	59%	55%	57%	n/a
Algebra I	53%	56%	57%	62%	62%
Algebra II	51%	45%	48%	50%	52%
Unified Geometry	55%	56%	57%	58%	59%
Mathematics for Tech I	56%	59%	60%	66%	66%

Performance on these tests varied widely among school systems. The following chart illustrates the differences in performance between the ten highest-scoring systems and the ten lowest-scoring systems.

Performance on the tests cannot be compared to other states or to the nation as a whole because they were customized for Tennessee and were not nationally normed. Nevertheless, test reports provide diagnostic data to help identify strong performance and areas that need improvement. Data from these assessments were also used to determine the academic “value-added” for schools and school systems by comparing actual scores to scores predicted based on each student’s performance on previous TCAP achievement tests. The tables on the following pages show the average predicted and actual scores for students in each school system along with an indicator of whether the value added, or gain, in each system was above, below or not significantly different from the gain statewide. The information presented is based on three-year averages.

Tennessee Public School Systems
Scholastic Aptitude Test–SAT I

The SAT I Reasoning test is one of three assessments approved by the State Board of Education to fulfill the requirement in state law that all students take an exit exam to receive a full high school diploma. This test is designed to measure many of the skills that are important to students' success in college. Because the subject matter of high school courses and grading standards vary widely among high schools, the test has been developed to provide a common standard against which students can be compared.

Only 7,556, or 13%, of Tennessee's 2000 college-bound seniors took the SAT I. Nationwide, 43% of the 2000 college-bound graduates took this test. Two factors make it difficult to compare overall scores in Tennessee to national scores: the relatively small number of students taking the test in Tennessee and the increase in the number of students taking the test as a result of the new exit exam requirement. A better comparison is Tennessee's top 10% versus the nation's top 10%. In this comparison, Tennessee students out performed their national counterparts by 26 points on the verbal section and by 6 points in mathematics.

Nine-year Trend for Scholastic Aptitude Test (SAT) Results

Year	Tennessee				Nation			
	Top 10 Percent		All Students		Top 10 Percent		All Students	
	Verbal	Math	Verbal	Math	Verbal	Math	Verbal	Math
1992	613	600	559	548	592	595	500	501
1993	615	604	561	549	593	596	500	503
1994	613	608	562	553	592	596	499	504
1995	628	619	571	560	598	600	504	506
1996	622	621	563	552	591	606	505	508
1997	619	617	564	556	589	606	505	511
1998	621	621	564	557	590	607	505	512
1999	620	619	559	553	590	607	505	511
2000	615	614	563	553	589	608	505	514

Note: SAT results are reported on a 200-800 point scale

The table on the following pages presents system average SAT scores. Some systems had very few students take the SAT assessment. Consequently, the data may not represent a valid estimation of true system achievement and should not be interpreted as such.

** Indicates four or fewer students taking the exam.

Tennessee Public School Systems
American College Test–ACT

The ACT is one of three tests approved by the State Board of Education to fulfill the requirement in state law that all students take an exit exam to receive a full high school diploma. The total number of Tennessee graduates taking the ACT rose 35% during the first four years of this new requirement: from 32,628 in 1995 to 44,019 in 2000. Included among those tested were 15,728 who had not completed a college preparatory course of study. Even with these dramatic increases in the number and percentage of students tested, Tennessee's students were able to narrow the gap between the state and national composite scores again in 2000 and are now equal to the SACS area. Two thousand marks the third consecutive year for improvement in the composite score for Tennessee. As shown in the table below Tennessee graduates improved performance in English, Reading, and the Composite scores. The table compares Tennessee's performance to the 13 states served by the Southern Association of Colleges and Schools (SACS) and to the nation as a whole.

ACT Averages for All Students

Area	English			Math			Reading			Science			Composite		
	92	99	00	92	99	00	92	99	00	92	99	00	92	99	00
Tennessee	20.2	19.8	19.9	19.3	19.1	19.1	20.8	20.4	20.5	19.9	19.8	19.8	20.2	19.9	20.0
SACS	19.8	19.7	19.7	19.3	19.5	19.6	20.2	20.3	20.4	19.8	19.9	20.0	19.9	20.0	20.0
Nation	20.2	20.5	20.5	20.0	20.7	20.7	21.1	21.4	21.4	20.7	21.0	21.0	20.6	21.0	21.0

With more Tennessee students moving into the category of those taking a full load of core academic courses, scores for that group unexpectedly remained at or above average scores for the southern states in English, Reading, and the Composite during 2000.

ACT Averages for Students Taking Core or More Courses

Area	English		Math		Reading		Science		Composite	
	1999	2000	1999	2000	1999	2000	1999	2000	1999	2000
Tennessee	21.1	21.0	20.0	20.0	21.4	21.4	20.6	20.6	20.9	20.9
SACS	20.8	20.7	20.5	20.4	21.3	21.2	20.7	20.7	21.0	20.9
Nation	21.6	21.5	21.8	21.8	22.4	22.4	21.9	22.0	22.0	22.1

The gap in composite scores for Tennessee males and females held steady in 2000 at two-tenths of a point, which equals the gap for the nation as a whole.

	English	Math	Reading	Science Reasoning	Composite
Females	20.3	18.6	20.6	19.4	19.9
Males	19.4	19.7	20.3	20.4	20.1

Tennessee Public School Systems
American College Test (ACT)—Work Keys

The ACT *Work Keys* assessment is one of three tests approved by the State Board of Education to fulfill the requirement in state law that all students take an exit exam to receive a regular high school diploma. Over 19,000 students took this test during the 1999-2000 school year. The assessment includes three components related to success in the work place. The components tested in 1999-2000 were:

- *Reading for Information*, which measures skill in reading and understanding work-related instructions and policies.
- *Applied Mathematics*, which measures skill in applying mathematical reasoning to work-related problems.
- *Locating Information*, which measures skill in using information presented in workplace graphics such as diagrams, floor plans, tables, graphs, charts, and instrument gauges. At the highest level examinees are asked to make decisions and draw conclusions based on information contained in one or more graphics.

There are no national norms for these tests, and different scales are used for each component to discourage combining scores from different tests into a single composite score. These tests are designed to provide a profile of skills that can be matched to profiles of skills necessary for particular jobs. As shown in the following chart, statewide average scores remained the same or increased from 1998-1999 to 1999-2000 in *Reading for Information* and *Applied Mathematics*. This was the second year for statewide administration of *Locating Information*, and the average score remained the same.

Statewide Average Scores

Component	Scale	1997-98	1998-99	1999-00
Reading for Information	(3-7)	4.1	3.9	3.9
Applied Mathematics	(3-7)	3.8	3.7	3.9
Locating Information	(3-6)	n/a	3.3	3.3

The performance of Tennessee students on the *Work Keys* assessment in each school system is provided in the table on the following pages.

Tennessee Public School Systems
Total Schools and Grades Served

The total number of Tennessee public schools operated in 1999-00 was 1,611. This was a 2.3 percent increase over the 1,575 public schools in 1997-98. The grades served in the local educational agencies have remained constant for the past three years. The following table shows the distribution of grades served during 1997-98, 1998-99 and 1999-00.

	1997-98 through 1999-00	
Grade	Number	Percent
K-5	1	1%
K-6	2	1%
K-8	11	8%
K-9	3	2%
K-12	120	87%
9-12	1	1%

Tennessee Public School Systems
Personnel by Category

Personnel are reported by assignment by the school systems to the Department of Education. Upon receipt of data from the schools, the Department groups personnel into six basic categories: administrators, teachers, student support personnel (guidance counselors and librarians, for example), teaching assistants, staff support personnel and other personnel, which includes everything from accountants to bus drivers.

A wide range of instructional and support personnel is required to effectively operate a school system. School systems' choices will vary based on local needs and local educational strategies. For example, the category "other personnel" may vary in size because some systems contract services such as maintenance and bus transportation while other systems hire personnel to provide those services. The only requirement imposed by the state is that certain class sizes be maintained in the regular academic and vocational education programs and that professional instructional personnel are qualified for their positions. [For more information about class sizes and personnel qualifications, see the sections on Class-Size Requirements and Employment Standards Waivers and Permits.]

The information in the following table includes percentages of employees for each of the six categories listed above. Each category is shown as a percentage of the total personnel employed by the system. For instance, statewide 50.8 % of total personnel were teachers and only 3.5% were administrators during 1999-00.

Tennessee Public School Systems
Employment Standards Waivers and Permits

Every teacher in Tennessee is required to hold a valid Tennessee Teaching License. The license contains endorsements for the specific areas in which the person is prepared to teach. If a local Tennessee school system wishes to employ a person who does not hold a valid license or has a valid license but not the required endorsements, the local school system must secure a permit or an employment standards waiver for the individual. These are issued under the following conditions:

- A permit is issued when a person the system or school wants to employ does not hold a Tennessee Teaching License. This person may be employed only until a licensed teacher can be secured for the position.
- A waiver of employment standards is required when both (a) a person qualified for the assignment is not available and (b) the applicant has a license, but does not have the endorsement required to teach the anticipated assignment. Employment standards waivers may be granted based on an Apprentice License or a Professional License.

As shown in the table below, the number of waivers has increased since 1997-98. However, between 1998-99 and 1999-00, 71 school systems decreased or had no change in the number of waivers requested for school personnel.

Number of Employment Standards Waivers and Permits

	1997-98	1998-99	1999-00	Percent Change	
				Three-year	One-year
Waivers	424	681	823	94.1%	20.9%
Permit	701	691	1390	98.3%	101.2%

The number of permits has increased substantially since 1997-98 and now stands at 689 more than in 1997-98. Even with the significant statewide increase in permits between 1997-98 and 1999-00, 87 school systems decreased or had no change in the number of permits requested for school personnel.

For information about the growth in the number of teachers, see the section entitled School System Personnel by Category.]

Tennessee Public School Systems
Expenditures by Public School Systems

General expenditure patterns for public school systems in Tennessee can be determined by looking at their annual financial reports. Patterns differ from system to system because each school system sets priorities based on their local needs, as well as statutory and regulatory requirements, and allocates funds to address those needs. Patterns derived from these reports may also differ—even in regard to services that all systems must provide—because of different arrangements they may have made for providing those services. Two significant examples that may cause some systems to appear to have lower expenditures are transportation and food service.

In the case of transportation, several Tennessee school systems contract with other school systems to provide these services for their students. This situation is apparent in the Transportation Expenditures table. In the case of food service, some school systems maintain accounting records for school cafeterias at individual schools, and the funds are accounted for in school cafeteria reports rather than in the school system's financial reports. However, patterns for food service expenditures for all systems, regardless of their accounting policies, are presented in the table Food Service Program—Cost per Meal.

Total expenditures in the tables on the following pages are presented in five general categories. They are as follows: operating expenditures (for the day-to-day operation of schools), capital outlay and debt service (for the construction and renovation of school buildings and for the payment of debt issued for school purposes), state administration (state expenditures on behalf of school systems), commodities (federal provisions for local school food service programs), and other expenditures (which includes activities such as community service).

[For a breakdown of Operating Expenditures by Major Function, refer to the section with that title.]

Tennessee Public School Systems
Expenditures by Function

The tables on the following pages show expenditures for the following major functions: regular instruction, special education, vocational education, system administration, operation and maintenance of school facilities, state-level expenditures for K-12 education, and the value of commodities provided for food service programs by the U. S. Department of Agriculture. Total expenditures and expenditures per Tennessee student are presented for each of these functions. In addition, total transportation costs and cost per student transported are presented in a separate table. Transportation costs vary among Tennessee school systems because some school systems contract with other systems to provide these services for their students and some systems do not provide transportation services. Refer to the notes at the end of the table to identify these systems. Finally, the average cost per meal served for each school system is presented in a separate table. Tennessee systems that provide breakfast as well as lunch programs are identified in the table because their average costs tend to be lower.

As shown in the following tables, the total amount spent for regular instruction increased from \$2.499 billion in 1998-99 to \$2.647 billion in 1999-00. This \$1.47 million increase evidences a strong commitment statewide to putting new state dollars into the classroom, where they will have the greatest impact on student learning. Expenditures per student for regular instruction increased from \$2,801 in 1998-99 to \$2,951. This 5.5% increase in expenditures per student is eleven times as great as the percent increase in the number of students for the same period. Instructional improvements include new teachers hired to reduce class sizes, additional textbooks, materials and supplies and instructional equipment. These improvements are possible as a direct result of the Basic Education Program (BEP) formula providing the funds necessary to have a high quality education for the students of Tennessee.

[For a summary of all expenditures, see the section entitled Expenditures by Public School Systems.]

Tennessee Public School Systems
Transportation Expenditures

* Transportation Notes:

Anderson County	(Provides transportation for South Clinton School located in Clinton City.)
Clinton City	(Anderson County provides transportation for South Clinton School.)
Oak Ridge	(Prior to 1996-97, Oak Ridge had pay services only.)
Alcoa City	(Provides transportation for Special Education and Pay Services.)
Carroll County	(Provides transportation for Hollow Rock-Bruceton SSD, Huntingdon SSD, McKenzie SSD, South Carroll SSD, and West Carroll SSD.)
Hollow Rock-Bruceton SSD	(Transportation provided by Carroll County.)
Huntingdon SSD	(Transportation provided by Carroll County.)
McKenzie SSD	(Transportation provided by Carroll County.)
South Carroll Co SSD	(Transportation provided by Carroll County.)
West Carroll Co SSD	(Transportation provided by Carroll County.)
Newport City	(Provides transportation for Special Education only.)
Crockett County	(Provides transportation for Alamo City and Bells City.)
Alamo City	(Transportation provided by Crockett County.)
Bells City	(Transportation provided by Crockett County.)
Dyer County	(Provides transportation for Dyersburg City.)
Dyersburg City	(Beginning in 1996-97, all transportation provided by Dyer County.)
Hawkins County	(Provides transportation for Rogersville City.)
Rogersville City	(Transportation provided by Hawkins County.)
Lexington City	(No transportation provided.)
Richard City SSD	(No Transportation provided.)
Sweetwater City	(System transports students and so does Monroe County.)
Union City	(No Transportation provided.)
Dayton City	(No transportation provided.)
Roane County	(Provides transportation for Harriman City.)
Harriman City	(Transportation provided by Roane County. Transports Special Education students.)

Tennessee Public School Systems
Expenditures per Student

The calculation of expenditures per student is intended to provide a basis for comparison among school systems of different sizes. Data used for this calculation include expenditures from school systems' annual financial reports, expenditures by the state on behalf of school systems and the value of commodities provided by the U. S. Department of Agriculture for school food service programs. Two categories of operating expenditures (student body and adult education) included in the school systems' financial reports are excluded from this calculation because they are not activities within the K-12 education program. The following chart illustrates the change in the expenditures per student from 1998-99 to 1999-00. These numbers are based on Average Daily Attendance (ADA's).

	1998-99	1999-00	Increase	Percent Increase
Lowest	\$4,037	\$4,281	\$244	6.0%
Average	\$5,485	\$5,797	\$312	5.7%
Highest	\$7,708	\$7,872	\$164	2.1%

Number of Tennessee School Systems by Range of Expenditures per Student

	1998-99	1999-00
\$4,000 to \$5,000	68	31
\$5,000 to \$6,000	54	85
More than \$6,000	16	22

Tennessee Public School Systems
**Expenditures for Principal and Interest on Bonded Debt
Paid by Other Agencies**

The table on the following pages presents the amount of principal and interest paid on bonds issued for the construction, renovation and equipping of K-12 schools by agencies other than school systems themselves. In Tennessee county and city systems, these payments are generally made from the debt service funds maintained by county executives and city managers and reported by school systems in their annual financial reports. Unlike city and county school systems, special school districts, which are created by the legislature, pay their own bonded debt. Therefore, the only figures included in this table for special school districts are amounts paid by two cities for schools built before the special school districts were established.

With the implementation of the Education Improvement Act (EIA) of 1992, which requires smaller classes, more classrooms are being built to provide space for additional teachers. This situation is reflected in the increase in bonded debt payments by other agencies for many of the school systems. Not shown in this table are amounts paid by school systems themselves. For these amounts, see the table entitled Expenditures for Capital Outlay and Debt Service elsewhere in this publication.

Yearly variances in the amount of bonded debt paid by other agencies are not unusual. Declines typically indicate that indebtedness was paid off during the year, while increases can represent either the issuance of new bonds or the refinancing of existing bonds to take advantage of lower interest rates.

Tennessee Public School Systems
Average Salaries for Teachers

For the 1999-00 school year, average salaries for teachers ranged from \$29,778 to \$44,318, with a statewide average of \$36,328. The statewide average increased 2.4% from the 1998-99 average, up from \$35,490.

Number of School Systems by Range in Average Teachers' Salaries

	1999-00	Percent
\$25-30,000	2	1.5%
\$30-35,000	97	70.3%
\$35-40,000	29	21.0%
\$40,000+	10	7.2%

Effective January 1, 1999 the General Assembly voted to give Tennessee Teachers a 2% increase in salary and effective July 1, 2000 the General Assembly voted for an additional 3.5% salary increase.

Tennessee Public School Systems
Public School Funding by Source

Tennessee public school systems receive funding from three primary sources: local, state and federal. State funds have become a larger portion of the total for most systems as a result of implementation of the Basic Education Program (BEP) formula, which was fully funded for the first time in 1997-98. The following chart shows the change in the mix between 1998-99 and 1999-00.

	1998-99		1999-00	
(in thousands)				
Local	\$2,034,908	42.0%	\$2,214,011	42.8%
State	\$2,391,609	49.0%	\$2,486,661	48.0%
Federal	\$ 437,976	9.0%	\$ 478,840	9.2%

The BEP formula is the primary source of state funds for local school systems. Additional state funds are allocated for the Career Ladder and Extended Contract programs and for driver education, school food service and vocational programs. Local funds for education are raised from two primary sources: property taxes and the local option sales tax. Additional sources of local revenue include wheel taxes, bank excise taxes and business taxes.

All federal funds are earmarked for specific purposes, such as vocational education and the education of disadvantaged, at-risk and handicapped students. Federal funds are also provided to teach English Language Learners, to subsidize school breakfast and lunch programs, and to offset tax losses as a result of large tracts of tax-exempt federal land in an area.

Tennessee Public School Systems
Incentive Awards Program

The Incentive Awards Program provides incentive awards authorization for the superior performance by local schools on specified measures of accountability. The goals and standards are mandated by legislation and established by the State Board of Education. The General assembly funds \$500,000 for the incentives program and these funds are available to schools only. The Department of Education awards these incentive funds to the local schools each spring.

The process for awarding these funds requires nomination of eligible schools by superintendents/directors and must meet the following criteria for each applicable area:

- Each school with students in grades 4-8 or any configuration including one or more of those grades must demonstrate a 3-year average cumulative gain greater than or equal to 100% in each of the 5 subject areas: math, reading, language arts, science, and social studies.
- High schools must demonstrate a System vs. State average of academic performance on the High School Subject Matter Assessment at the “Not Detectably Different” (NDD) or Above range for each subject applicable for each school.
- The goal for K-6 attendance is 95%. The goal for 7-12 attendance is 93%. The school must meet or exceed the applicable goal(s) in attendance for the grades served.
- The goal for K-8 promotion is 97%. If a school serves a student population at the 8th grade level or below, that school’s aggregate promotion rate for the applicable grades must meet or exceed the state goal.
- The goal for dropout rate in grades 9-12 is 10% or less. If a school serves a student population that includes students in 9th grade or above, that school’s dropout rate for the applicable grades must be less than or equal to 10%.

These funds are divided equally among schools that qualify each year.

In 1997-98, 68 schools received \$7,353.

In 1998-99, 111 schools received \$4,504.

In 1999-00, 137 schools received \$3,650.

The information in the following table shows the total amount of money received in each school district over the last 3 years.

Tennessee Public School Systems
Basic Education Program (BEP) Formula

The Tennessee Education Improvement Act (EIA) of 1992 established the Tennessee Basic Education Program (BEP) as the funding formula for kindergarten through grade twelve education in Tennessee. The components of the formula are grouped into two categories for determining the state and local share of formula funding in each school system: classroom and non-classroom. The EIA requires the state to pay 75% of the statewide cost of the classroom components and 50% of the statewide cost of the non-classroom components. [For more information on how responsibility for funding the cost of the BEP formula is divided between the state and local funding bodies, see the section entitled County-Area Fiscal Capacity.]

The split within the BEP formula between funding for classroom and non-classroom components has remained fairly constant— statewide and at the system level—with classroom components making up about 70% of the total. The split between classroom and non-classroom categories in actual local spending varies from that in the BEP formula for several reasons. For example, the BEP formula does not include the cost of local salary supplements. As a result, the actual percent of funds spent in the classroom category may be greater than the percentage of the BEP formula that falls into the classroom category.

The tables on the following pages show each Tennessee system's amount of classroom and non-classroom full funding (state and local combined); the system's classroom and non-classroom state and required local match funding expressed as a percentage of total BEP formula funding (classroom and non-classroom, state and local); and the amount and percentage of total funds that each system actually spends in classroom and non-classroom areas.

Tennessee Public School Systems
County-Area Education Fiscal Capacity

Many factors influence a local government's ability to raise revenue for education. The fiscal capacity figures used to determine the required local share in the Basic Education Program (BEP) formula are provided by the Tennessee Advisory Commission on Intergovernmental Relations (TACIR). Fiscal capacity is calculated for each of the 95 Tennessee county areas and is based on the factors that best predict the amount of revenue local governments in Tennessee can be expected to raise for education.

TACIR updates the data in the model and produces a new measure of fiscal capacity each year based on an average of three-years of data. The data is shown in the following tables for the year in which it was used in the BEP formula. The factors found by TACIR to best predict actual local revenue for education include:

- tax base: total taxable sales and equalized assessed property values.
- ability to pay (tax payer equity): per capita income.
- resident tax burden: ratio of residential and farm property assessment to total property assessment.
- service responsibility: ratio of average daily membership of students in public schools to total population.

The percentages calculated with the TACIR formula are used to divide responsibility for the local share of the Basic Education Program (BEP) formula among the counties. The state pays 75% of the cost of the BEP classroom components and 50% of the non-classroom components. The TACIR fiscal capacity percentages are multiplied by the aggregate, statewide local share of the BEP funding (after the state-paid amount is deducted) to determine the amount for which each county area is responsible. This calculation produces the state and local percentage shares used to determine each public school system's funding. These figures are presented in the following tables.
